

Vacuum packers standing model

VP-1000

*Industrial vacuum packer
machines designed for medium
productions*

Technical Information

- Entirely made in stainless steel.
- Transparent lid.
- Double sealing
- Soft air
- Inlet plate for height adjustment of the vacuum chamber
- Easy maintenance.
- Pump 100m³/h.

Options

- Gas flushing entrance.
- Electric bag cut-off.
- Sensor control panel
- 100m³/h Busch pump

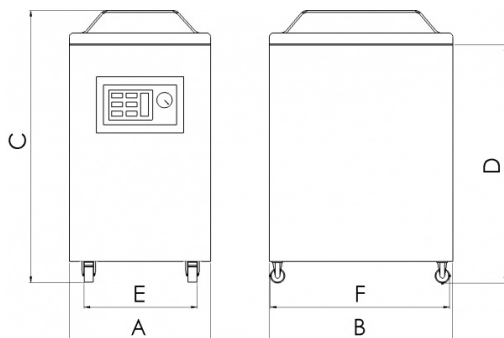

Accessories

- Inclined inlet plate for packaging products with liquid or sauce
- Connector for external vacuum container.

Measures

A	1,080 mm.
B	700 mm.
C	1,040 mm.

Control Panel

Time control panel without gas

- Digital control panel.
- Vacuum control by time.
- Sealing time regulation.
- Soft-Air.
- VAC-STOP push button, finish the vaccum and continue tghе process.
- Monitoring step by step of the cycle through led.
- Vacuum gauge.

Time control panel with gas

- Digital control panel.
- Vacuum control by time.
- Gas flushing entrance control by time.
- Sealing time regulation.
- Soft-Air.
- VAC-STOP push button, finish the vaccum and continue tghе process.
- Monitoring step by step of the cycle through led.
- Vacuum gauge.

Sensor control panel with gas

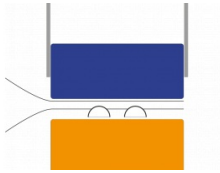

- Digital control panel.
- Vacuum control by sensor.
- Gas flushing entrance control by sensor.
- Sealing time regulation.
- Soft-Air.
- VAC-STOP push button, finish the vaccum and continue tghе process.
- VAC+ push botton, additional vaccum time.
- Maintenance push botton control.
- 99 memory positions.
- Monitoring step by step of the cycle through led.

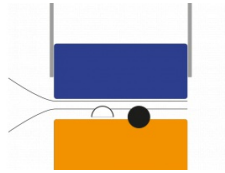

Welding Type

Double sealing

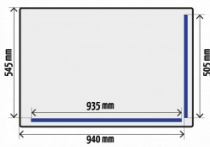

Sealing + cut

Tray Type

VP-1000 AB

VP-1000 AA
