

Vacuum packers table top models

VP-430.20

*Professional, reliable and
modern vacuum packer
machines*

Technical Information

- Entirely made in stainless steel.
- Transparent lid.
- Double sealing
- Soft air
- Digital panel
- Pneumatic sealing, wireless sealing bar
- Easily removable sealing bar
- Inlet plate for height adjustment of the vacuum chamber
- Easy maintenance
- Pump 20m³/h.

Options

- Gas flushing entrance.
- Electric bag cut-off.
- Sensor control panel
- 20m³/h Busch pump

Accessories

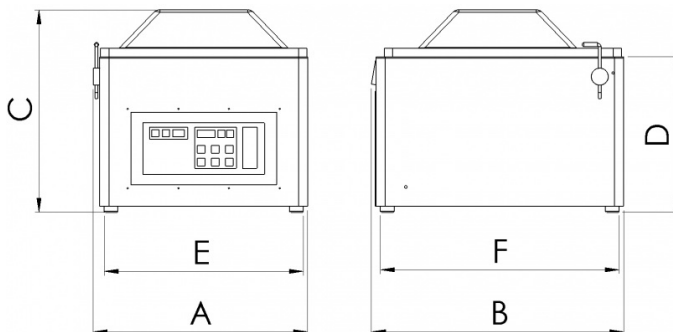

- Inclined inlet plate for packaging products with liquid or sauce
- Connector for external vacuum container.

Measures

A	490 mm.
B	580 mm.
C	470 mm.

Control Panel

Time control panel without gas

- Digital control panel.
- Vacuum control by time.
- Sealing time regulation.
- Soft-Air.
- VAC-STOP push button, finish the vacuum and continue the process.
- Monitoring step by step of the cycle through led.
- Vacuum gauge.

Time control panel with gas

- Digital control panel.
- Vacuum control by time.
- Gas flushing entrance control by time.
- Sealing time regulation.
- Soft-Air.
- VAC-STOP push button, finish the vacuum and continue the process.
- Monitoring step by step of the cycle through led.
- Vacuum gauge.

Sensor control panel with gas

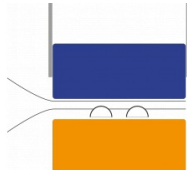

- Digital control panel.
- Vacuum control by sensor.
- Gas flushing entrance control by sensor.
- Sealing time regulation.
- Soft-Air.
- VAC-STOP push button, finish the vacuum and continue the process.
- VAC+ push button, additional vacuum time.
- Maintenance push button control.
- 99 memory positions.
- Monitoring step by step of the cycle through led.

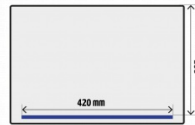

Welding Type

Double sealing
